

Please do not do any thing to lesson Indiana's telephone privacy law. We value our time at home and with Indiana's law our time is much more enjoyable. We work at night sometimes and we can leave our phones on in the day time to receive emegency calls from our kids schools and not be woke up to many telemarketing calls the way it is. In todays world a family needs a phone and we pay for phone services it should be enough we don't have to put up with telemarketers for our nessisary phone services. I am begging you please do not lesson Indiana's phone privacy laws. Thank You for Your time. William F Klaus Jr.
